-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 24 May 2007.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1- 4, 8-11, 14-17, 21-26 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardinge in view of Good and Doyle. The patent to Hardinge teaches structure substantially as claimed including table, means for securing (at 6) including mounting plates, a plurality of legs, the only difference being that there is no means for adjusting position and the legs are not telescopingly adjustable. However, the patent to Good (26)) teaches the use of providing adjusting structure for a work surface to provide mobility and the patent to Doyle teaches the use of providing telescopingly adjustable legs with control means to be old. It would have been obvious at the time of the invention to modify the structure of Hardinge to include a means for adjusting position, as taught by Hughes and vertically adjustable legs and control means, as taught by Doyle since such structures are conventional alternative support structures used in the same intended purpose, thereby providing structure as claimed. The use of pneumatic adjusting structures and control means is conventional structure commercially available. To use such structures as an alternative structure used in the

same intended purpose of providing an adjustment would have been obvious and well within the level of ordinary skill in the art, thereby providing structure as claimed.

Claim 5, 13, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hardinge in view of Good and Doyle as applied to the claims above, and further in view of Ostertag et al. The patent to Hardinge in view of Good and Doyle teaches structure substantially as claimed as discussed above including a table, the only difference being that there is no lighting fixture to provide light for the work area. However, the patent to Ostertag et al teaches the use of providing a lighting fixture for a work surface to be old. It would have been obvious and well within the level of ordinary skill in the art at the time of the invention was made to modify the structure of Hardinge in view of Good to include a lighting fixture, as taught by Ostertag et al since such structure is used in the same intended purpose of providing light for structures placed thereon, thereby providing structure as claimed.

### ***Response to Arguments***

Applicant's arguments filed 05-24-07 have been fully considered but they are not persuasive. The rejections still as stated above. Further, such modifications would have been predictable and within common sense with ordinary skill in the art.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3637

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
